

COLOR WHEEL

Assembly Instructions

- 1) Assemble the 4 colored lens quarters by laying them flat with raised edges facing up. Clip edges together.
- 2) Assemble motor housing and base with included hardware as shown. Tighten until housing holds desired angle.
- 3) Insert standard incandescent light bulb (60 watt maximum). Light bulb not included.
- 4) Attach assembled lens from (1) above, including 2 washers, onto threaded motor shaft.
- 5) Be sure all components are assembled securely and plug cord into standard wall outlet.

WARNING

Do not operate the Color Wheel unattended for long periods of time. The light bulb can get extremely HOT when used for extended periods. Great care should be exercised when handling bulb. Do not use a light bulb in excess of 60 watts.
For indoor use only.
